Academic qualifications:

- Higher National Diploma in Quantity Surveying, Port Elizabeth
- Fellow of the Association of Arbitrators Southern Africa
- Certificate in Risk Management IRM UK

Membership of professional institutions:

- Association of Arbitrators
- Institute of Risk Management UK
- Society of Construction Law

Experience and fields of work:

40 years' experience in the construction industry with 2 major contracting companies, primarily involved in heavy civil engineering and earthworks projects – power stations, steel plants, water and sewage treatment works, airports, harbours, open cast mining, bulk earthworks, roads, rail and bridges – both inside and outside South Africa.

Norman has prepared or defended many claims ranging from unforeseen conditions and extensions of time to the more complex issues of disruption and the secondary impact of delays or disruption.

Specializing in:

Norman is fully conversant with the FIDIC suite of documents, the SAICE General Conditions of Contract, the NEC and the JBCC Principal Building Agreement and associated subcontracts.

As outlined more fully above Norman has significant experience on heavy civil engineering and earthworks projects.

Dispute Adjudication Experience:

As a fellow of the Association since 2007 Norman has acted either as adjudicator or arbitrator on various disputes. He also acts as an adjudicator on referrals received from outside the Association.
